Summary

Full-stack software engineer working across web, mobile, AI/ML and blockchain. I ship features end to end with NestJS, React, React Native, Python and .NET, and use AI coding tools (Claude Code, Codex) every day.

Experience

ElkTech — Associate Software Engineer Jan 2026 – Present

- **Kira AI**: AI assistant for web, desktop, iOS and Android (5-person team), showcased at the Dubai AI Festival.
  - **Payments:** built Kira Pay, the in-app wallet (transfers, payouts, payment links, cards, KYC), on an append-only double-entry ledger integrated with the Ellicash payment gateway.
  - **Verifiable AI actions:** every action Kira's agents take gets a receipt in a Merkle log stamped on Base (Ethereum L2), which users can verify on Basescan.
  - **Agent workflows:** project boards and a sales CRM where AI agents (research, writing, coding, browsing, calling) work on tickets, with automations and email follow-ups run from chat or voice.
  - **Mobile & desktop:** 10+ features in the React Native app (AI Lawyer, Shopping, Homework, Kira Code, AI receptionist) and the Electron app's offline mode, which runs chat and voice on local models.
- **Naito**: Instagram Reels analytics for a French client. As main developer, built the Python video-analysis pipeline (Whisper transcription, thumbnail heatmaps, topic modeling, virality scores) and the React frontend.
- **Lean AI Factory**: toolkit for on-device AI in iOS apps. Curated 30 open-source ML models; built Skill Studio (tunes coding-agent skills with local LLMs) and a UI audit tool that predicts where users look.
- **Helpath**: platform for UK domestic-abuse refuges (rooms, cases, support work); built features in Next.js and NestJS.

US Mobile — Product Support Engineer Oct 2025 – Dec 2025

- Resolved connectivity and account issues for 4+ customers at once with a 98.2% CSAT and 92.8% quality score.
- Traced root causes of network and account bugs for Product and Engineering; ranked 2nd of 20 in training.

Big Entities — Software Engineering Intern Jul 2025 – Oct 2025

- Backend engineer (.NET Core) on **FieldForce AI**, a task and analytics platform used by 2,000+ staff at Pharmasol and Biocare Pharmaceuticals, and **Healers**, a Canadian telehealth app for booking physicians in person or online.
- Built features and fixed bugs in the APIs behind their React web apps and mobile apps, managed their SQL Server and PostgreSQL databases, and released through Dev → QA → UAT → Prod.

Clicksotic — Front End Developer Mar 2024 – Feb 2025

- Built the frontends for the Caroline School of Law website (WordPress) and its learning management system (React, Django, PostgreSQL), with role-based dashboards and controlled file access.
- Built the React frontend for **DripSaint**, a custom-apparel store, including its AI print designer and Stripe checkout.

Exputer — Gaming Content Writer (Part-time) Jul 2023 – Aug 2024

- Published 30+ game guides on Fortnite, LEGO Fortnite and Minecraft, and moderated the site's forums.

Projects

- **ObscuraNet** (Final Year Project, team of 4; *Python*): serverless P2P messaging with onion routing, ChaCha20-Poly1305, proof-of-work Sybil resistance and dummy traffic; tested on 100 Docker nodes, under 2 s delivery.
- **Decentralized Learning Platform** (*Solidity, React, Node.js, MongoDB*): Ethereum smart contracts handle course creation, purchase and enrollment through MetaMask, with course data kept off-chain in MongoDB.
- **Mood Flicks** (*Llama 3*): movie recommender that suggests films from how a user describes their mood.

Technical Skills

- **Programming:** TypeScript, JavaScript, Python, C#, SQL, Solidity
- **Frontend & Mobile:** React, Next.js, Angular, Tailwind CSS, React Native (Expo), Electron
- **Backend:** NestJS, Node.js, Express, .NET / ASP.NET Core, Django, FastAPI, REST APIs
- **AI/ML:** PyTorch, TensorFlow, LLMs (Llama 3, Ollama), AI agents, Whisper, CLIP, scikit-learn, NumPy
- **Blockchain:** Ethereum, Base, Solidity, viem, Web3.py, MetaMask, Merkle proofs
- **Data & DevOps:** PostgreSQL, SQL Server, MongoDB, Prisma, Redis, BullMQ, Docker, Nginx, AWS S3, Git
- **Tools:** Claude Code, Codex, Stripe, Twilio, Playwright **Spoken:** English, Urdu (both fluent)

Education

Forman Christian College (A Chartered University), Lahore — BS Computer Science 2021 – 2025

Awards & Leadership

- 1st of 80, FCCU GDSC Programming Competition (2023); Best Project nominee, FCCU COMSPEX (2025)
- Co-Lead, Registration Team, Ignite FCCU (2023); Lead, Registration Team, Omnilife VR/AR Society (2022)
